CAPITAL MANAGEMENT.

RECORD DIVIDEND WHILE STILL REDUCING DEBT AND INVESTING IN GROWTH.

Our position:

- In FY20, net debt was reduced by $34.9m to $116.5m.
- Leverage ratio\(^1\) = 1.46x at 30 June 2020.
- Well supported by banks

Capital management philosophy:

- Having considered Hansen’s capital requirements, strong capital structure and liquidity position, the Board has determined an increased dividend to return money to shareholders is appropriate.
- Final FY20 dividend of 7.0 cents per share has been declared, 10% franked, taking total dividends for FY20 to 10.0 cents, representing a 46% NPATA payout ratio for the year.
- Level of dividend is at the discretion of Board subject to available cash and activity being undertaken at the time - targeting 5 cents base final dividend on an ongoing basis.
- Hansen’s strong cash generation means that even with this increased dividend and special dividend we have the cash flows to invest in our products and fund acquisitions.

Notes:

1. Leverage ratio: net debt (including pre-paid borrowing costs) / EBITDA excluding impact of IFRS16 and non-recurring items.
